About Us

Founded in 2025 by a farmer's son, Mana Gramasethu was born from real experiences in the fields and villages of India.
Growing up close to farming communities, we witnessed the everyday struggles farmers face — lack of timely access to genuine inputs, unclear pricing, and limited support when it matters most.
Mana Gramasethu was created with a simple belief: farmers deserve better access, better trust, and better outcomes.

Nano Urea Liquid Fertilizer for High Crop Yield

Nano Urea Liquid Fertilizer is an advanced nitrogen fertilizer developed to improve crop productivity and nutrient efficiency. It helps plants absorb nutrients quickly and supports healthy crop growth with reduced fertilizer usage. Nano technology ensures effective nitrogen delivery directly to plant cells for better agricultural performance.

Conclusion

Nano Urea Liquid Fertilizer is an innovative solution for modern agriculture. It helps farmers achieve higher crop yield while reducing fertilizer costs and environmental impact. By adopting nano fertilizer technology, farmers can improve productivity, crop quality, and sustainable farming efficiency.
